

## Individual Reflection Week 1- Patrik Olsson

### **What do I want to learn or understand better?**

#### **What is (A):**

Currently, I do not know what I do and do not understand. Therefore, it is difficult to say exactly what I want to understand better. I have barely worked with scrum before so I will probably have much to learn.

#### **What might or should be (B):**

I think it would be beneficial if my knowledge of scrum was increased in order to maximize the workflow.

#### **A plan for going from A to B:**

I believe that the best way for me to reach B is to practice by working on the project.

### **How can I help someone else, or the entire team, to learn something new?**

#### **What is (A):**

Currently, I have not had the chance to help anyone learn something new yet. This is most likely due to the fact that we have only worked one week.

#### **What might or should be (B):**

This is probably something that will be more clear due to the coming weeks.

#### **A plan for going from A to B:**

Like mentioned before, I will have to see in the coming weeks.

### **What is my contribution towards the team's use of Scrum?**

#### **What is (A):**

Currently, I have not worked on scrum as we have not begun the project itself.

**What might or should be (B):**

Efficient use of scrum where it is clear what I am working on.

**A plan for going from A to B:**

By working on the project itself, I will probably learn to better utilize scrum.

**What is my contribution towards the team's deliveries?****What is (A):**

My contribution towards the team's deliveries has not been anything noticeable. This is mostly due to the fact that we have barely begun to work on the project. However, I will miss the exercise next week.

**What might or should be (B):**

I will try to participate in scheduled activities as much as possible.

**A plan for going from A to B:**

I can reach B by planning in time. If it is not possible to participate, I will have to find another time to follow up on what was done as well as contribute individually to the work.
