

## **Individual reflection week 7 Felix Edholm**

### **What do I want to learn or understand better?**

**What is:** This week I got to actually apply my newfound knowledge of Room in practice. I felt like I got a good understanding of how the library works and what to look for if something is not working, the syntax and commands etc.

**What might or should be:** So far I have mostly worked with the review part of the application and I would like to understand more of the other parts.

**A plan for getting from where you are to where you want to be:** In order to get a better understanding of parts not related to reviews I should take on user stories that are about the other parts of the program and gain knowledge through working with them.

### **How can I help someone else, or the entire team, to learn something new?**

**What is:** This week I could lend a helping hand to some of my teammates when they encountered bugs. I helped by looking through the code, reading some documentation and discussing with the ones having the problems and we were able to solve them.

**What might or should be:** I should be reachable when someone has a question or a problem that I can help with. I should also continue to explain things that I feel that I understand that someone else does not.

**A plan for getting from where you are to where you want to be:** To be reachable I should continuously look at discord and see if someone has written something directly to me or in the group chat that I can help with. Other than that I should be attentive to if someone has an issue with something I understand.

### **What is my contribution towards the team's use of Scrum?**

**What is:** I have continued to participate in all Scrum-specific meetings. During the meetings I have participated in the vocal discussions as well as helped write things down in the documents that we have together.

**What might or should be:** I should continue to contribute in the same way that I have this week.

**A plan for getting from where you are to where you want to be:** To achieve this I should continue to attend all meetings and be vocal and contribute in any way that I can at that moment.

### **What is my contribution towards the team's deliveries?**

**What is:** Our deliveries for this sprint was to continue with our user stories as well as deliver a team reflection. This week when I finished a user story and had some time left I talked to my team and asked if someone needed help and that was the case so I could contribute to another user story with the time I had over. I also contributed to the team reflection by discussing and writing in the document.

**What might or should be:** I hope to continue contributing to our deliveries and I should also do as I did this week and help someone else if I have time over.

**A plan for getting from where you are to where you want to be:** I should continue to finish my work to the best of my ability, take part in the team reflection and contributing how I can as well as help my teammates if I have time
