

- What do I want to learn or understand better?

Now that the coding is underway there are some question marks over the framework. Either we can use LiveData to subscribe to changes in the model or use two way databindings. At this point I have to read more about databindings to understand the perks before giving my opinion to the group.

- How can I help someone else, or the entire team, to learn something new?

Moving forward, the MVVM pattern will be more and more nested into the User Stories and hopefully I can help my team members with the implementation process. This will be important to keep the structure organized.

- What is my contribution towards the team's use of Scrum?

Keep writing more user stories and tasks. Also do my best to always try to complete the user stories I choose at the sprint planning.

- What is my contribution towards the team's deliveries?

This week I completed the info tab for coffees. All relevant components have methods to change or act on user input set up in the view java-class.
