

- What do I want to learn or understand better?

As said from last week I need to get a better understanding of livedata. Linus has shared a playlist with videos explaining every part of the framework. Through watching this I will hopefully improve my knowledge in this area.

- How can I help someone else, or the entire team, to learn something new?

The MVVM is still a bit vague on how to properly use it. Moving forward I will keep giving feedback on the implementation made by my team (as far as my own knowledge is sufficient).

- What is my contribution towards the team's use of Scrum?

Keep writing more good user stories and actively participating in discussions.

- What is my contribution towards the team's deliveries?

This week I made implementations for the history-tab. This includes a list of made reviews of coffees. Also a search bar that can filter the list. Finally I helped David solve his user story with implementation of a search bar for our search-tab.
